

# Factors Affecting the Performance of Sustainability on Banking Industry Affected by Strategic Market Orientation and Strategic Leadership Competence which are Dedicated by Organizational Culture

Willy Arafah

Faculty of Economic and Business, University Trisakti, Grogol, (DKI) West Jakarta, Indonesia

## Abstract

The banking industry is defined as anything related to banking institutions, including institutions, business activities, and ways and processes in carrying out its business activities. The research results show all the hypothesis are positive: (1). The market orientation strategy influences the organizational culture of the Bank in Jakarta; (2). Strategic leadership competence affects the organizational culture of the Bank in Jakarta; (3). Market orientation strategy influences the performance of Banking employee Bank in Jakarta; (4). Competence of strategic leadership affect the performance of banking employee Bank in Jakarta; (5). Organizational culture affects the performance of banking employee Bank in Jakarta; (6). Strategic market orientation and strategic leadership competencies jointly affect the organizational culture of Banks in Jakarta; (7). Strategy of market orientation, strategic leadership competence and organizational culture together affect the performance of banking employee Bank in Jakarta; (8). Mediating effect of organizational culture can increase the influence of market orientation strategy on banking performance at Bank employees in Jakarta; (9). Mediating effect of organizational culture can increase the influence of strategic leadership competence on banking performance at Bank employees in Jakarta.

## Keywords

The Market Orientation Strategy, Organizational Culture, Strategic Leadership Competence, Strategy of Market Orientation

## Introduction

In the banking sector and industry is defined as anything related to financial institutions, including institutions, business activities, and ways and processes in carrying out its business activities. While the main function of Indonesian banking is as a financial intermediation institution that collects and distributes public funds. Judging from its function, banks have a strategic position, namely as a supporter of the smooth payment system, the implementation of monetary policy and the achievement of financial system stability. So it is necessary a healthy and transparent banking industry. In addition to functioning as a financial intermediary, banking is also a business entity that has a goal to seek profit. According to Indonesian Banking Statistics published on December 12, 2012, credit growth reached 22.40% from Rp 2,028.14 trillion in October 2011 to Rp 2,482.52 trillion as of October 2012. The growth raised the ratio between loans and Third Party Funds (Loan To Deposit Ratio (LDR) from 81.03% per October 2011 to 83.78% as of October 2012. Thus, the national banks have passed the minimum LDR of 78% as stipulated by Bank Indonesia. Related to the more mature performance and as a form of appreciation to the banks in Indonesia that have managed to achieve an excellent brand performance index during the year 2012, MarkPlus Insight

and Magazine Marketeers provide the award "Indonesia Brand Champion Award 2013".

Based on the above background, then the problems posed in this study are as follows: (1). Is there any effect of Strategic Market Orientation on Organization Culture? (2). Is there any influence of the Strategic Leadership Competence on Organization Culture? (3). Is there a concerted influence on the Strategic Market Orientation and Strategic Leadership Competence towards Organization Culture? (4). Is there any effect of Strategic Market Orientation on Firm Performance? (5). Are there any Strategic Leadership Competence influences on Firm Performance? (6). Is there any influence of Organization Culture on Firm Performance? (7). Is there any influence of Strategic Market Orientation, Strategic Leadership Competence and Organizational Culture to Firm Performance? (8). Are there any Strategic Market Orientation influences on Firm Performance mediated by Organization Culture? (9). Are there any Strategic Leadership Competence influences on Firm Performance mediated by Organization Culture?

## II. Literature Review

Performance can be interpreted as achievements achieved by the company in a certain period that reflects the level of health of the company (Sukhemi, 2007). The theory of industrial economics in particular analyzes the relationship between one activity to another, the interdependence of one another in the market and the link between market conditions, corporate behavior and economic performance. The main focus in studying industrial economics is corporate behavior in industry. The industry economy studies the company's policies in dealing with competitors and consumers (including price-setting behavior, advertising, and product research and development). Joe S. Bain (Dennis and Perloff, 2000) defines industry as a group of companies that produce the same products and uses. The same process. While Shadily (1992), said performance or performance is powerless achievement or results. Wahyudi Kumorotomo (1996) provides limits on the concept of public organization's performance at least related closely to efficiency, effectiveness, fairness and responsiveness. This means that performance is an action that can be seen, observed and made possible to achieve the expected (goals). We can defined the performance can also be said to be a combination of ability, effort and opportunity toward the works or job. Culture has an important role as a way of thinking, accepting the situation and feel something in the company. Deal and Kennedy. (2000) Webster's New Collegiate Dictionary defines culture as an integrated pattern of human behavior including thoughts, speech, actions, and artifacts and depends on the capacity of people to listen, and pass on knowledge to future generations. According to Phithi Sithi Amnuai quoted Tika (2008) Organizational culture is a set of basic assumptions and beliefs embraced by members of the organization, then developed and inherited to address the

problems of external adaptation and internal integration issues. According to the Greenberg and Robert (2003) organizational culture is as a cognitive framework consisting of attitudes, values, norms of behavior and expectations received with members of the organization. The root of every and each of organizational culture is a setting of core characteristics that are valued collectively by members of the organization. Meanwhile, according to Robbins (2003) organizational culture is a common perception held by members of the organization, a system of shared meaning. Organizational culture is concerned with how workers perceive characteristics of an organizational culture. Cunha and Cooper (2001) also state "organizational culture impact on financial performance, personal retention rates, and even on the success or failure of mergers and acquisitions", that the success of a company is largely determined by its success in creating a distinctive work culture Part of their strategic plan, because a good work culture will have an impact on performance, employee loyalty levels and success to work together. Strategic Marketing Orientation, Grinstein (2008) in the European Journal of Marketing views market orientation as one of the corporate elements - culture and behavior - that implements customer orientation. Grinstein (2008) cites the definition of market orientation (MO) by Narver and Slater (1990) that defines MO as: "organizational culture that most effectively and efficiently creates superior superiority Performance for the business". Therefore, the market-oriented behavior of the company has three components, namely consumer orientation, competitor orientation, and interfunctional coordination orientation and these components must be supported by the relevant culture. Shin (2012) in International Business Research explains that consumer orientation emphasizes or focuses on understanding consumer target as in delivering or delivering superior value to its customers. According to Robbins and Coulter (2009), the leadership style can be: (1) Transformational leadership (transformational leadership); (2) Transactional leadership (transactional leadership). Transformational leadership (transformational leadership) is: stimulating leadership inspires subordinates to achieve remarkable results. Transformational terms berinduk from word to transform which means to transform or change something into another different form. This transformational leadership works toward the goal of directing the organization to an unprecedented goal. Robbins and Judge (2015) say that, in transformational leadership, the leader inspires followers to transcend their own self-interests for the good of the organization; They can have a profound and extraordinary effect on followers. Effect of Strategic Marketing Orientation on Organizational Culture can be seen from the study carried out by: (1). Hina Zafar, Muhammad Haroon Hafeez Mohd Noor Mohd Shariff (2016), entitled Relationship Between Market Orientation, Organizational Learning, Organizational Culture and Organizational Performance: mediating Impact Of Innovation; (2). Mehdi Ghanavati (2014), entitled The Effect Of Corporate Culture And Market orientation On Iranian Industrial SME, S Performance: (3). Siberia O. Owino Joseph and Francis (2015), a study entitled The Influence Of Organizational Culture and Market Orientation on Performance of Microfinance Institutions In Kenya, so that research can be summed up hypotheses, as follows:

H1: There is influence of Strategic Market Orientation to Organization Culture.

The influence of Strategic Leadership Competence on Organization Culture can be seen from the research conducted by: (1). Leena P. Singh and Binita Panda (2015) entitled Impact Of Organizational

Culture On Strategic Leadership Development With Special Reference To Nalco; (2). Dimitrios Belias and Athanasios Koustelios, with research entitled The Impact Of Leadership And Change Management Strategy On Organizational Culture, so the above research can be formulated hypothesis, as follows:

H2: There is influence of Strategic Leadership Competence towards Organization Culture.

The influence of Strategic Marketing Orientation on Organizational Culture can be seen from the research conducted by: (1). Hina Zafar, Muhammad Haroon Hafeez and Mohd Noor Mohd Shariff (2016) entitled Relationship Between Market Orientation, Organizational Learning, Organizational Culture And Organizational Performance: Mediating Impact Of Innovation; (2). Mehdi Ghanavati (2014) entitled The Effect Of Corporate Culture And Market Orientation On Iranian Industrial SME, S Performance: (3). Owino O. Joseph and Kiberia Francis (2015), with a study entitled The Influence Of Organizational Culture And The Market Orientation On Performance Of Microfinance Institutions In Kenya: (4). Leena P. Singh and Binita Panda (2015) entitled Impact Of Organizational Culture On Strategic Leadership Development With Special Reference To Nalco; (5). Dimitrios Belias and Athanasios Koustelios, with research entitled The Impact Of Leadership And Change Management Strategy On Organizational Culture, so the above research can be formulated hypothesis, as follows:

H3: There is joint influence of Strategic Market Orientation and Strategic Leadership Competence towards Organizational Culture

The influence of Strategic Marketing Orientation on Firm Performance can be seen from research conducted by: (1). Jin K. Han and Namwoon Kim entitled Market Orientation and Organizational Performance: Is Innovation a Missing Link?; (2). Kamalsh Kumar, Ram Subramanian, Karen Strandholm, entitled Market Orientation and Performance: Does Organizational Strategy Matter? So the above research can be formulated hypothesis, as follows:

H4: There is influence of Strategic Market Orientation to Firm Performance

The influence of Strategic Marketing Orientation to Firm Performance can be seen from the results of research conducted by: (1). Dimitrios Belias and Athanasios Koustelios, entitled The Impact of Leadership and Change Management Strategy on Organizational Culture: (2). T. O'Toole and B. Donaldson, (2002) "Relationship Performance Dimensions of Buyer-Supplier Exchanges," European Journal of Purchasing and Supply Management: (3). A. G. Abdul-Mumin, (2005) "Instrumental and Interpersonal Determinants of Relationship Satisfaction and Commitment in Industrial Markets, so the above research can be formulated hypothesis, as follows:

H5: There is influence of Strategic Leadership Competence to Firm Performance

The influence of Organization Culture on Firm Performance can be seen from the results of research conducted by: (1) Mohammad Jasim Uddin, Rumana Huq Luva, Saad Md Maroof Hossain (2013), entitled Impact of Organizational Culture on Employee

Performance and Productivity: A Case Study Of Telecommunication Sector in bangladesh: (2). M. Elena Gomez - Miranda, M Carmen Perez, Eva Argante and Lazaro Rodriguez (2017), entitled The Impact of Organizational Culture on Competitiveness Efficiency in Spanish - Moroccan International Joint Venture: (3). Arjun Chaudhuri, Morris B. Holbrook (2001) The Chain of Effects from Brand Trust and Brand Affect to Brand Performance: The Role of Brand Loyalty. Andreassen, Tor Wallin; Lindestad, Bodil (1998) Customer loyalty and complex services: The impact of corporate image on quality, customer satisfaction and loyalty for customers with varying degrees of service expertise. So the above research can be formulated hypothesis, as follows:

H6: There is an influence of Organization Culture on Firm Performance.

The influence of Strategic Marketing Orientation, Strategic Leadership and Organizational Culture together against Firm Performance, can be seen in research conducted by: (1). Hina Zafar, Muhammad Haroon Hafeez and Mohd Noor Mohd Shariff (2016) entitled Relationship Between Market Orientation, Organizational Learning, Organizational Culture And Organizational Performance: Mediating Impact Of Innovation; (2). Mehdi Ghanavati (2014) entitled The Effect Of Corporate Culture And Market Oreintation On Iranian Industrial SME, S Performance: (3). Owino O. Joseph and Kiberia Francis (2015), with a study entitled The Influence Of Organizational Culture And The Market Orientation On Performance Of Microfinance Institutions In Kenya: (4). Leena P. Singh and Binita Panda (2015) entitled Impact Of Organizational Culture On Strategic Leadership Development With Special Reference To Nalco; (5). Dimitrios Belias and Athanasios Koustelios, with a study entitled The Impact Of Leadership And Change Management Strategy On Organizational Culture: (6). Hina Zafar, Muhammad Haroon Hafeez and Mohd Noor Mohd Shariff (2016) entitled Relationship Between Market Orientation, Organizational Learning, Organizational Culture And Organizational Performance: Mediating Impact Of Innovation; (7). Mehdi Ghanavati (2014) entitled The Effect Of Corporate Culture And Market Oreintation On Iranian Industrial SME, S Performance: (8). Owino O. Joseph and Kiberia Francis (2015), with a study entitled The Influence Of Organizational Culture And Market Orientation On Performance Of Microfinance Institutions In Kenya: (9). Leena P. Singh and Binita Panda (2015) entitled Impact Of Organizational Culture On Strategic Leadership Development With Special Reference To Nalco; (10). Dimitrios Belias and Athanasios Koustelios, with a study entitled The Impact Of Leadership And Change Management Strategy On Organizational Culture: (11). Mohammad Jasim Uddin, Rumana Huq Luva, Saad Md Maroof Hossian (2013), entitled Impact of Organizational Culture on Employee Performance and Productivity: A Case Study of Telecommunication Sector in bangladesh: (2). M. Elena Gomez - Miranda, M Carmen Perez, Eva Argante and Lazaro Rodriguez (2017), entitled The Impact of Organizational Culture on Competitiveness Efficiency in Spanish - Moroccan International Joint Venture, so the above research can be formulated hypothesis, as follows:

H7: There is an Effect of Strategic Market Orientation, Strategic Leadership and Organizational Culture together against Firm Performance.

The influence of Strategic Marketing Orientation on Firm

Performance can be seen from research conducted by: (1). Jin K. Han and Namwoon Kim entitled Market Orientation and Organizational Performance: Is Innovation a Missing Link?: (2). Kamalesh Kumar, Ram Subramanian, Karen Strandholm, entitled Market Orientation and Performance: Does Organizational Strategy Matter? So the above research can be formulated hypothesis, as follows:

H8: There is an influence of Strategic Market Orientation on Firm Performance mediated by Organizational Culture.

The influence of Strategic Marketing Orientation to Firm Performance can be seen from the results of research conducted by: (1). Dimitrios Belias and Athanasios Koustelios, entitled The Impact of Leadership and Change Management Strategy on Organizational Culture: (2). T. O'Toole and B. Donaldson, (2002) "Relationship Performance Dimensions of Buyer-Supplier Exchanges," European Journal of Purchasing and Supply Management: (3). A. G. Abdul-Mumin, (2005) "Instrumental and Interpersonal Determinants of Relationship Satisfaction and Commitment in Industrial Markets, so the above research can be formulated hypothesis, as follows:

H9: There is an influence of Strategic Leadership Competence on Performance Firm mediated by Organizational Culture.

### III. Research Methods

Population is a generalization region consisting of objects or subjects that have certain qualities and characteristics that have been determined by researchers to be studied and then drawn conclusions. (Sugiyono, 2008). In this study the population used are employees who work in Bank Mandiri, BCA and CitiBank in Jakarta.

Table 1: Number of Research Population

No	Bank Name	Total Employees
1.	Bank Mandiri	3725
2.	Bank BCA	4120
3.	CitiBank	1050
	<b>Jumlah Total</b>	<b>8895</b>

Sourcess: Data Process, 2016

Taking note of the above statement, because the total population is more than 100 people, the sampling in this study using proportionate stratified random sampling (Sinambela, 2014). While the sampling technique using the formula of Taro Yamane or Slovin (Riduan, 2011) as follows:

$$n = \frac{N}{1 + Ne^2}$$

Information

n = Sample size

N = Population Size

E = significance level 5

Based on the above formula, the sample size in this study can be calculated as follows:

$$n = \frac{8895}{1 + (8895, 05^2)}$$

$$n = 383$$

**IV. Research Findings**

From the research results obtained the following results

Table 2: Respondent Demographic Data

No	Deskripsi	Frekuensi	Persentase(%)
1.	Sex		
	Male	254	66.3
	Female	129	33.7
2.	Age		
	20-30 Years Old	18	4.7
	30-40 Years Old	172	44.9
	40-50 Years Old	182	47.5
	> 50 Years Old	11	2.9
3.	Place of Living		
	Central Jakarta	15	3.9
	West Jakarta	166	43.3
	East Jakarta	47	12.3
	South Jakarta	17	4.4
	North Jakarta	34	8.9
	Bodetabek	73	19.1
	etc	31	8.1
4.	Education		
	Diploma	23	6.0
	Undegraduate	281	73.4
	Master	69	18.0
	Doctor	10	2.6
5.	Job		
	Supervisor	11	2.9
	Asistant Manager	9	2.3
	Manager	5	1.3
	Head of Division	6	1.6
	Vice Director	4	1.0
	Director	4	1.0
etc	344	89.8	
6.	Income		
	5.000.000 - 10.000.000	344	89.8
	10.000.001 - 15.000.000	20	5.2
	15.000.001 - 20.000.000	5	1.3
	20.000.001 - 25.000.000	6	1.6
>25.000.001	8	2.1	

Next will be presented a full model SEM parameter testing λ (loading factor / coefficient indicator) measurement on exogenous and endogenous models. This test is intended to determine whether or not the indicators of each latent variable (construct). This analysis measures the t-values and coefficients of structural equations. By testing the t-value is greater than 1.96. For t-value value of coefficient / parameter and coefficient / parameter value (estimation) can be seen in the following figure:

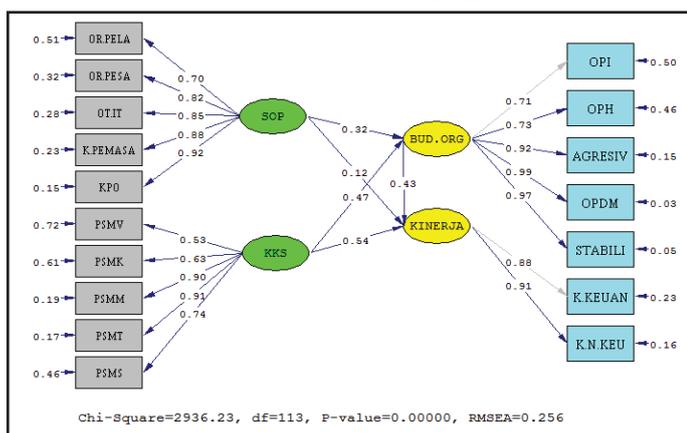

Fig. 1: Structural Models (Estimates)

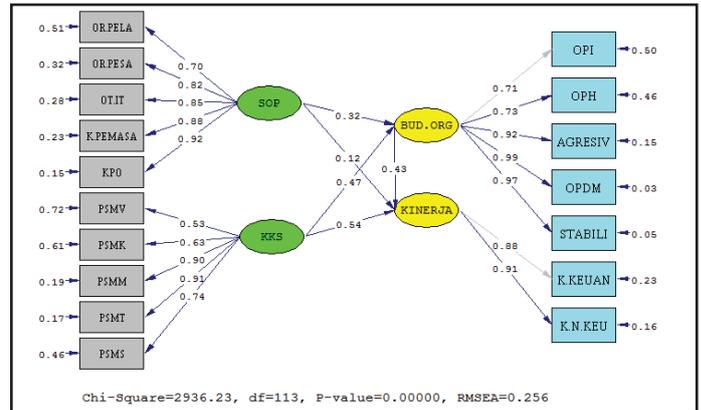

Fig. 2: Structural Models (Standardized Solutions)  
Source: Results of Treatment with LISREL 8.8

Standardized solutions model drawings show complete model path diagrams with numbers that are standardized estimation results.

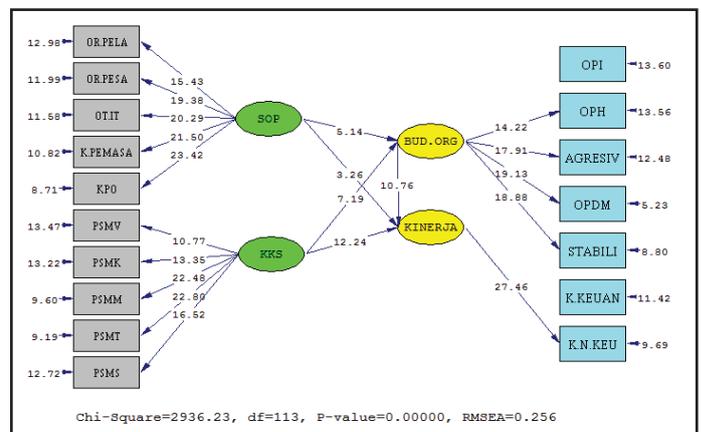

Fig. 3: Structural Model (T Values)  
Source: Results of Treatment with LISREL 8.8

The t-values model image shows a complete model trajectory diagram with numbers indicating the t-value of each of the corresponding estimates. The <math>t < 1.96</math> ( $\alpha = 5\%$ ) value is shown in red and indicates that the corresponding number is not significant or equal to zero. In result of data analysis by using method of Structural Equation Model (SEM) and by using tool of software processing application of LISREL 8.8 hence obtained summary index of suitability model as in Table below:

**Structural Equations**

$BUD.ORG = 0.32 * SOP + 0.47 * KKS, Errorvar. = 0.45, R^2 = 0.55$ (0.062) (0.066) (0.058) 5.14 7.19 7.74

**V. Conclusion**

This research objective is to find out the factors influencing banking performance. This research uses survey method, which aims to know the general description about the influence of market orientation strategy and competency leadership competitiveness to organizational culture and its implication to banking performance. Based on the results of hypothesis testing and discussion in the previous chapter, it can be concluded some research results as follows:

1. The market orientation strategy influences the organizational culture of the Bank in Jakarta. The influence of market orientation strategy on organizational culture is positive and significant, with the most dominant market orientation

- strategic dimension being on the dimensions of organizational change. This shows that the improvement of market orientation strategy especially ability dimension organizational change will result in increased organizational culture.
2. Strategic leadership competence affects the organizational culture of the Bank in Jakarta. The influence of strategic leadership competence on organizational culture is positive and significant, with the most dominant strategic dimension of strategic competence is on the strategic leadership has the ability to motivate and inspire others. This shows that the improvement of strategic leadership competence, especially the strategic leader has the ability to motivate and inspire others will lead to increased organizational culture.
  3. Market orientation strategy effect the performance of Banking employee Bank in Jakarta. The influence of market orientation strategy on banking performance is positive and significant, with the most dominant market orientation strategic dimension being on the dimensions of organizational change. This shows that the improvement of market orientation strategy, especially on the dimensions of organizational change, will result in increased banking performance.
  4. Competence of strategic leadership affect the performance of banking employee Bank in Jakarta. The influence of strategic leadership competence on banking performance is positive and significant, with the most dominant strategic dimension of strategic competence is on the strategic leadership has the ability to motivate and inspire others. This shows that the improvement of strategic leadership competence, especially on the strategic leadership has the ability to motivate and inspire others will result in increased banking performance.
  5. Organizational culture influence the performance of banking employee Bank in Jakarta. The influence of organizational culture on banking performance is positive and significant, with the most dominant organizational dimension being on the orientation dimension of management support. This shows that the improvement of organizational culture is primarily on the dimension of the orientation of management support. Will be able to improve banking performance.
  6. Strategic market orientation and strategic leadership competencies jointly affect the organizational culture of Banks in Jakarta. The influence of market orientation strategy and strategic leadership competence altogether on organizational culture is positive and significant, with strategic competency leadership varieties having more dominant influence on organizational culture. This suggests that positively improving the effectiveness of market orientation strategies and strategic leadership competencies will lead to increased organizational culture.
  7. Strategy of market orientation, strategic leadership competence and organizational culture together affect the performance of banking employee Bank in Jakarta. The influence of market orientation strategy, strategic leadership competence and organizational culture simultaneously on banking performance is positive and significant, with the variables of market orientation strategy having the most dominant influence on banking performance. This shows that positively improving the effectiveness of market orientation strategies, strategic leadership competencies and organizational culture will result in improved banking performance.
  8. Mediating effect of organizational culture can increase the influence of market orientation strategy on banking performance at Bank employees in Jakarta. This shows that

positively improving the effectiveness of organizational culture will result in increased influence of market orientation strategy on banking performance.

9. Mediating effect of organizational culture can increase the influence of strategic leadership competence on banking performance at Bank employees in Jakarta. This shows that positively improving the effectiveness of organizational culture resulted in increased influence of strategic leadership competence on banking performance.

### **Managerial Implications**

The results of this research found that there is a great effect of market orientation strategy and strategic leadership competence on organizational culture and implicate on the performance of banking employee Bank in Jakarta, can be described as follows:

This study found that market orientation strategy has a positive and significant impact on organizational culture. The implication is that if it will improve the organizational culture it is necessary to improve the market orientation strategy. The effort to improve the orientation strategy market done with efforts such as; Has a commitment to provide satisfaction for customers; Always strive to collect information from customers to meet customers' needs; And always discuss the strategy of competitors.

This research finds that strategic leadership competence has positive and significant effect on organizational culture. The implication is that if it will improve organizational culture then it needs improvement of strategic leadership competence. Efforts to improve the competence of strategic leadership can be done with effort; Have endurance in the face of problems; Against all forms of offenses and discrimination; And encourage the formation of a knowledge management culture.

This study finds that market orientation strategy has a great impact and significant impact on banking performance. The implication is that if it will improve the performance of banking, it is necessary to improve the market orientation strategy. The effort to improve the market orientation strategy can be done with the effort; Has a commitment to provide satisfaction for customers; Always strive to collect information from customers to meet customers' needs; And always discuss the strategy of competitors.

This study finds that strategic leadership competencies have a positive and significant impact on bank performance. The implication is that if it will improve the performance of banking, it is necessary to improve the competence of strategic leadership. The effort to improve the competence of strategic leadership can be done with the effort to have the resistance in facing the problem; Against all forms of offenses and discrimination; And encourage the formation of a knowledge management culture.

This study found that organizational culture has a great impact and significant influence on banking performance. The implication is that if it will improve the performance of banking, it will need to improve the organizational culture. The effort to improve the organizational culture can be done with an effort to create a conducive working environment such as thinking not to switch offices; Feel that the environmental changes occurring in the office can be estimated; And the office always gives attention and assistance if there are employees facing problems in the completion of work.

This research finds that there is a positive and significant influence alongside market orientation strategy and strategic leadership competence to organizational culture. The implication is that improving the organizational culture requires concurrent improvement of market orientation strategy and strategic leadership

competence. The effort to improve the effectiveness of market orientation strategy and strategic leadership competence can be done with commitment to give satisfaction to the customer; Always strive to collect information from customers to meet customers' needs; And always discussing competitor strategies; And have endurance in the face of problems; Against all forms of offenses and discrimination; And encourage the formation of a knowledge management culture.

This research results there are positive and significant influences together with market orientation strategy, strategic leadership competence and organizational culture on banking performance. The implication is that if it will improve the performance of banking, it needs simultaneous improvement of market orientation strategy, strategic leadership competence and organizational culture. Improvement strategy of market orientation, strategic leadership competence and organizational culture can be done with effort; Has a commitment to provide satisfaction for customers; Always strive to collect information from customers to meet customers' needs; And always discussing competitor strategies; And have endurance in the face of problems; Against all forms of offenses and discrimination; And encourage the formation of a knowledge management culture; As well as a conducive working atmosphere such as thinking not to switch offices; Feel that the environmental changes occurring in the office can be estimated; And the office always gives attention and assistance if there are employees facing problems in the completion of work.

This study finds that the mediating effect of organizational culture can improve the relationship of market orientation strategy on banking performance on Bank employees in Jakarta.

### Suggestions

After doing this research, based on empirical findings obtained, then the final part of this dissertation writing, the authors convey some suggestions in efforts to improve market orientation strategy, strategic leadership competence with mediated by organization culture against banking performance. After look at the results of research it can be put forward suggestions as following.

1. Bank leaders, need to keep things that are already good and improve things are still lacking in an effort to improve the effectiveness of market orientation strategies. The things that must be maintained to improve the effectiveness of market orientation strategies are: to have a commitment to provide satisfaction to customers; Always strive to collect information from customers to meet customers' needs; And always discuss the strategy of competitors. While things to improve are like: always trying to make an introduction to new services; Always strives to meet sales targets; And strive to increase the number of subscribers.
2. Bank leaders, need to keep things that are good and improve things are still lacking in an effort to improve the effectiveness of strategic leadership competencies. The things that must be maintained to improve the effectiveness of strategic leadership competencies are like: having endurance in the face of problems; Against all forms of offenses and discrimination; And encourage the formation of a knowledge management culture. While things to improve are like: respect the contribution of others; Encouraging innovation and creativity; And always see the opportunity to do something different.
3. Bank leaders, need to keep things that are already good and improve things are still lacking in an effort to improve the culture of the organization. The things that must be maintained to enhance the organizational culture are like: a conducive

working atmosphere such as thinking to not switch offices; Feel that the environmental changes occurring in the office can be estimated; And the office always gives attention and assistance if there are employees facing problems in the completion of work. While things to improve are like: able to cooperate with teammates in completing the work; Correcting shortcomings in the completion of work in order to improve the work; And concerned with the work standards that the office implements, because the top priority is not important to work.

4. Bank leaders, need to maintain good things and improve things are still lacking in efforts to improve banking performance. The things that must be maintained to improve the performance of banking is like: have a commitment to provide satisfaction for customers; Always strive to collect information from customers to meet customers' needs; And always discuss the strategy of competitors. While things to improve are like: always trying to make an introduction to new services; Always strives to meet sales targets; And strive to increase the number of subscribers.
